

Enhance school improvement, empower staff development, and streamline policy management with an all-in-one solution tailored for International schools. Gain real-time insights, ensure compliance, and drive continuous improvement effortlessly.

What is SchooliP?

SchooliP is a cloud-based solution designed to enhance the efficiency and effectiveness of educational institutions. It aims to streamline administrative processes, facilitate strategic planning, and foster a culture of continuous improvement among staff and students.

SchooliP ensures that all stakeholders are aligned with the school's objectives. This integration allows for clear goal-setting, efficient resource allocation, and ongoing monitoring of progress, ultimately contributing to enhanced educational outcomes.

There are 6 key features contained within SchooliP, they are comprised of:

For your School

We understand that every international school operates differently. That's why our platform offers extensive customisation options to ensure it aligns with your specific requirements. With flexible settings and configurable tools, you can create a solution that truly fits your school's improvement strategy.

1 Custom Workflows & Monitoring Forms

Design and implement workflows that reflect your school's internal processes, ensuring seamless alignment with your strategic objectives. Tailor monitoring forms to capture key performance indicators, observations, and evaluations specific to your school's framework.

2 Personalised Colour Scales & Terminology

Ensure consistency and clarity by customising rating scales, colour indicators, and terminology across the platform. Whether aligning with ISI, Ofsted, or your own internal standards, you have full control over how progress is measured and communicated.

3 Bespoke Reporting & Dashboards

Generate real-time reports that provide insights tailored to your leadership team's needs. Customise dashboards to highlight critical areas, ensuring a clear overview of school improvement, staff development, and compliance at a glance.

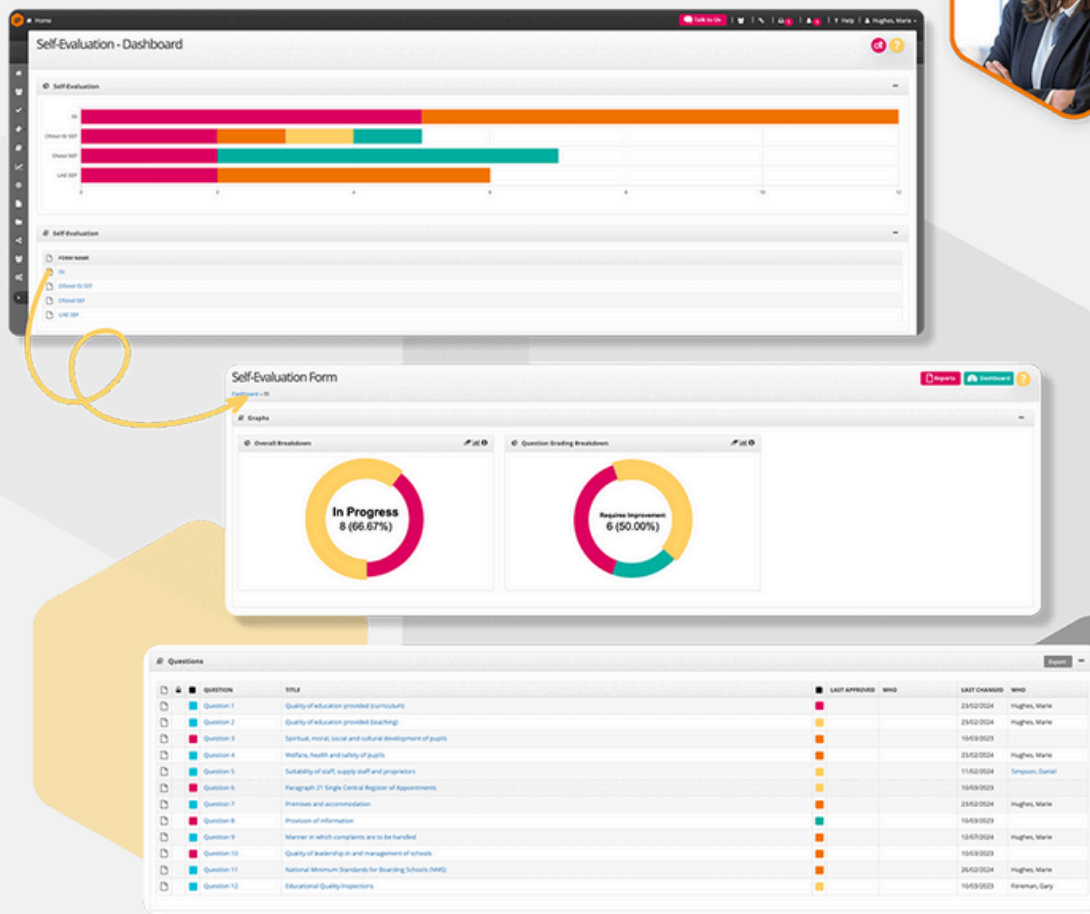

4 Flexible Integration & Data Management

Our platform seamlessly integrates with your existing management systems (MIS), enabling smooth data flow across platforms. With flexible data fields and export options, you can structure information in a way that best supports your school's operations.

With these advanced customisation features, our platform ensures that your school improvement journey is tailored, efficient, and aligned with your institution's unique goals.

Self-Evaluations with SchooliP

SchooliP is designed to support all school inspection frameworks, offering a flexible and structured approach to self-evaluation and compliance. Schools can gather departmental responses, link them to strategic action plans, and store key evidence against each section to streamline the inspection process. The platform is fully adaptable while providing dedicated support for widely recognised frameworks such as ISI, KHDA, and BSO, among others. This ensures that international schools can effectively manage their inspection preparations, track progress, and drive continuous improvement, regardless of their chosen accreditation body.

who uses

SchooliP is used by over 700 schools and academies to seamlessly manage their school improvement.

Sarah Wade

Amity International School

"It has been a key software in helping us ensure we have the data in place for inspections."

"I don't see it as a bolt-on for our school. I see it now as an essential platform to enable us to work effectively and efficiently."

"You get this plethora of platforms bombarding you with promises, but SchooliP has actually delivered."

Carolyn Bailey

Sheikh Zayed Private Academy For Girls

"SchooliP has really helped us to re-think how we evaluate ourselves, capture evidence and constantly drive toward our key goals in an easy-to-use and time-efficient manner."

"Like all schools, we already had robust systems in place, but SchooliP helped us to harmonise those into one central place and provide easy access to everyone. It helped us to get things off saved drives and make sure everyone knows exactly where to look and how to store evidence. The amount of evidence at senior leaders' fingertips to evidence progress and action for any part of our SDP, SEF and quality assurance programs is now far more readily available and all teachers contribute in a way that is really easy for them too."

Christian Barkei

St George's International School Luxembourg

"the data that we can generate out of SchooliP in a very simple and straightforward manner is really invaluable... Previously, before we had an online system, we were doing things by hand effectively. Now, it takes us very little time, indeed, to generate meaningful reports, which are very, very helpful in terms of making decisions about where we can allocate resources.

"The IP suite supports strategic whole school and college curriculum area planning ... It's not just a question of saying it's a system that, you know, the school wants you to use. It's a system that staff themselves can benefit from."

Taking the next step

If you would like to take the next step and find out more about SchooliP, please see below my contact details and a link to my diary where you can schedule a demonstration.
